TI-ARDI

Acceptor/Connector Pattern

: Application

: Acceptor

: Dispatcher

Acceptor

Acceptor	Handle1	ACCEPT_ EVENT

register_handler()

1. { handle_events()

Event

accept()

: Handle2

2. {

: Service Handler

Handle2		
	Service Handler	**Events**

| Handle2	open()

register_handler()

Event

3. { handle_event()
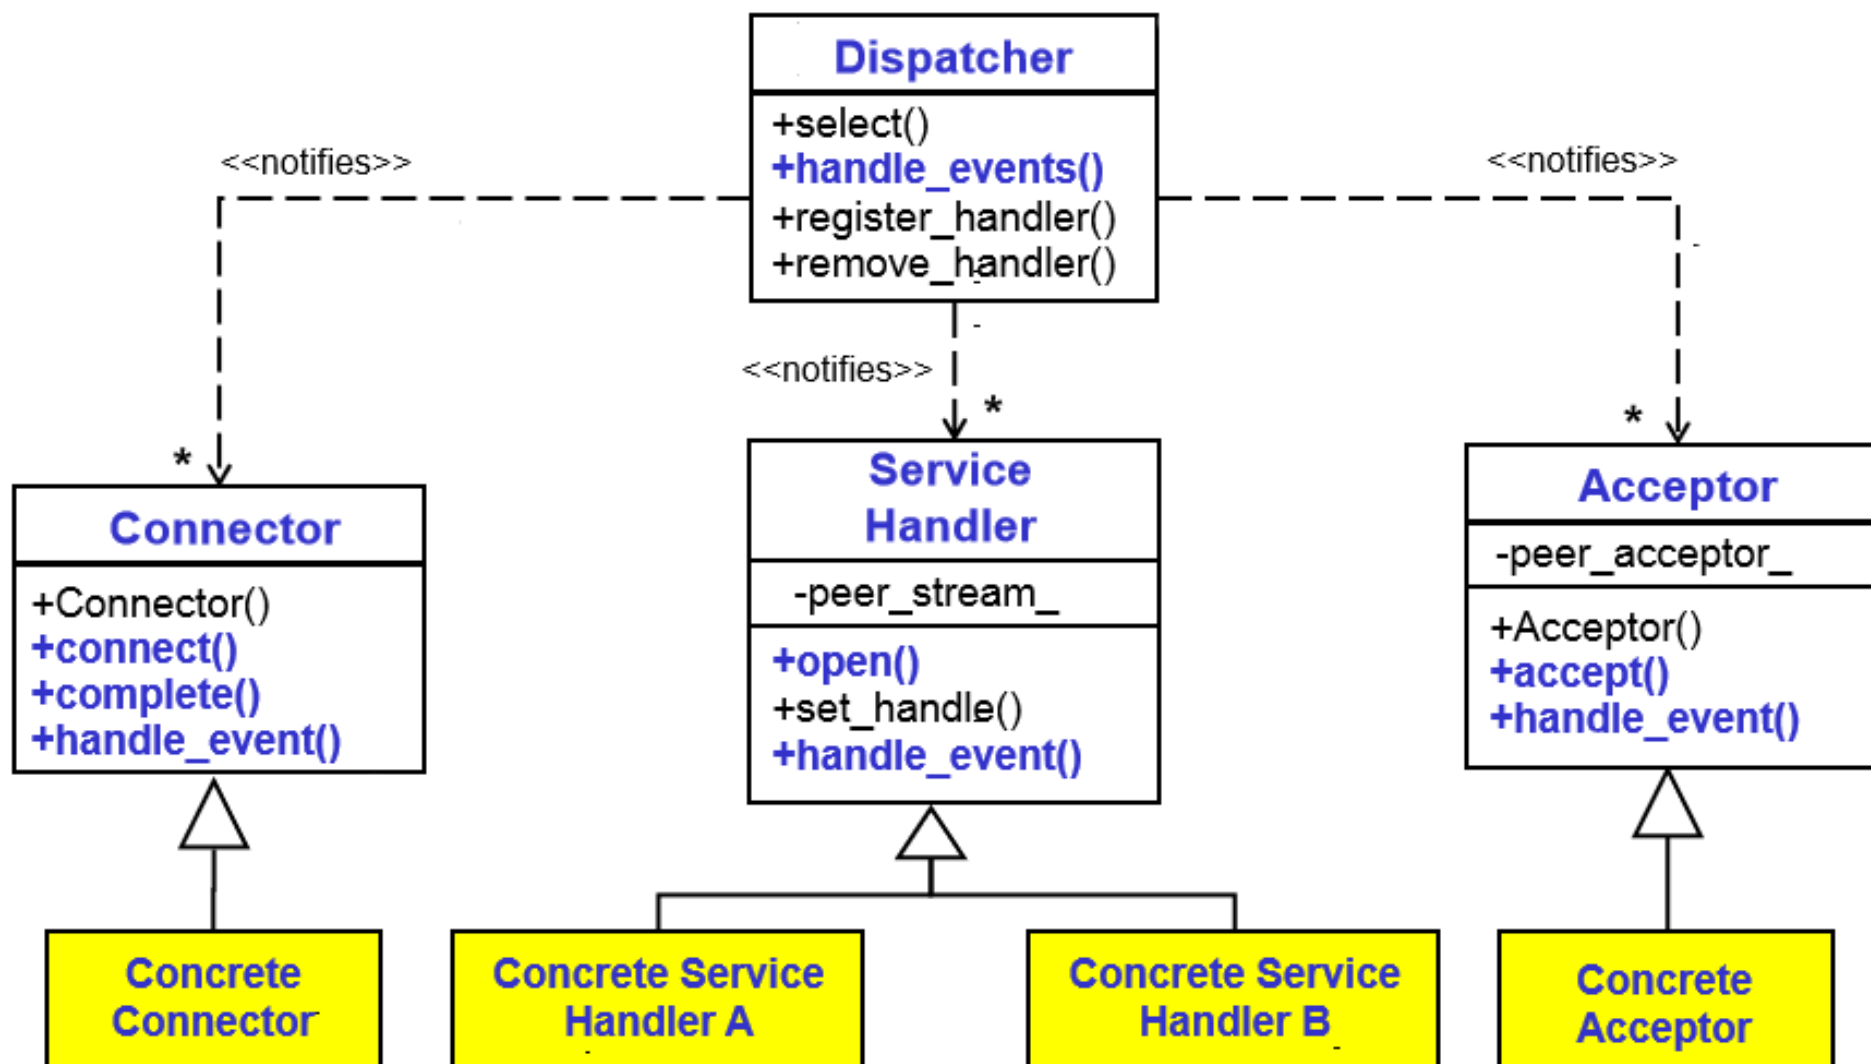

service()

1. Passive-mode endpoint initialize phase
2. Service handler initialize phase
3. Service processing phase
